

Proofreading Services

Written by Bahadır Özkazanc

TRANSLATION PROOFREADING SERVICE;

Notwithstanding the language of translation or area of subject, the errors in your translations are cancelled out by means of exchange of views by our expert and native proofreaders group. Thanks to the special systems we used during proofreading of your translation, we examine all details one by one and correct the errors right down to all details. In such Works, pricing is made on total number of characters or words in the text. When you send your translations to us, our proofreaders examine the text and provide you with information on translation of the text.

One of the cases encountered in Translation Control System is that the previous translation does not reflect the accurate meaning and is made in a wrong way. In such cases, Tele Tercüme reviews your translations and provides you with translation service upon your request. Moreover, it provides this service for half price.
